New TR-34 Turf Tire from OTR Optimizes Tractor and Mower Performance in Various Conditions

ROME, GA. – [OTR Engineered Solutions \(OTR\)](#) introduces the TR-34 tire for farm tractors and ride-on mowers. It offers exceptional performance on grass, mud and loose soil, while reducing the risk of turf damage and soil compaction.

The TR-34 tire features an innovative non-directional design that optimizes tread wear, ride comfort and traction in both directions. The tread pattern is a hybrid between turf and industrial styles, helping it achieve an ideal balance of performance and cost.

The tread-to-void ratio on the TR-34 tire ensures even pressure distribution throughout the contact patch, which reduces the risk of turf damage and soil compaction. Siped R1-style shoulder lugs enhance traction in mud and loose soil. Also, strategically placed mud breakers and rock ejectors provide efficient clean-out.

Four tire sizes are available: 16 X 7.50-8; 18 X 8.50-10; 24 X 12.00-12; and 26 X 12.00-12.

Brian Walter, Vice President-OEM Sales, said, “The TR-34 was developed with end customers and turf equipment manufacturers in mind. It features a unique non-directional tread design, so there are no left or right tires for easy installation. It also delivers more function vis-à-vis its hybrid R3/R4 tread, with aggressive styling that our research confirms will enhance the appeal of the machine itself. This will make it a true win-win in the market.”

OTR Engineered Solutions is a market-leading global enterprise specializing in off-the-road solutions for original equipment manufacturers (OEMs) and aftermarkets. Known for market-leading tire and wheel innovations, OTR also provides value-added services such as warehousing, tire mounting, and sequencing. The firm has long established strategic partnerships with OEMs covering Construction, Lawn & Garden, Powersports, Agriculture, Forestry, Mining, Material Handling, and Specialty Vehicle markets. OTR’s infrastructure comprises 31 facilities and warehouse locations throughout the U.S., Canada, Europe, and Asia, serving customers globally.
