

# Mining

Wheels

## **OTR Engineered Solutions (OTR)**

is your global partner for high-quality off-the-road tires, wheels, assemblies, and accessories. We are proud to supply end-user customers, dealers, and original equipment manufacturers with engineered solutions to meet and exceed common — and uncommon — challenges in such core markets as Agriculture, Construction, Forestry, Industrial, Lawn & Garden, Material Handling, Mining, Powersports, and Specialty Vehicles. But our success is much more than the products we offer. We're a multinational enterprise with more than 1,400 employees throughout 32 facilities worldwide dedicated to supporting you with a full range of high-level services to help you Roll More™.

### **Mining**

OTR's product lineup for vehicles used in surface and underground mining is the result of many years of experience, innovations, and a hands-on approach that ensures our products get the job done. Whether you are focused on vehicle productivity, utilization, safety, or value, OTR's team will help you find the right solution.

# Features and Notes

## Standard OTR Wheels

- Designs and sizes compliant with industry standards; compatible as replacements for all wheel brands used in market.
- Full penetration welds with 100% phased array ultrasonic (PA) inspection to assure weld integrity and long-life.
- OTR wheels produced in ISO 9001 registered facilities.

## Heavy-Duty Wheels

- Fully-machined lock ring grooves for precise fitment and stress relief.
- Fully-machined O-ring grooves for optimal sealing and air pressure retention.
- Heavy-duty back sections for extreme loads and duty cycle.
- Notched rim bases; outdoor driver pocket options available.
- Special alloy steel option for wheels used in high-pressure applications.  
Consult with your OTR salesperson for more information.
- Valve hole size/placement options for select rim bases.

## Large Diameter Wheels (49"-63")

- HSLA-grade steel used for critical components.
- Seamless forged gutters and fully-machined sections.
- Integrated bead seat Sur-Loc design to prevent inflation when using incorrect mounting ring.

## 6- & 7-Piece Quick-Change Wheels

- Designs enable demount and vertical mounting without having to remove inside dual tire.
- Compatible with popular fitments and replacements of other brands used in market.

## Underground Mining Wheels

- Seamless forged sections for all critical components.
- Fully machined flanges, gutter, and back sections ensure mating component parts have exact fitment needed with evenly distributed stress for reduced wear.

## Additional Notes

- NHS referenced in tire size: Not for Highway Service.
- Sur-Loc side rings available for 25"-29" diameter wheels.

# Guide Information

## Quick Reference Guide

OTR produces and supplies standard and custom wheels for surface mining applications, ranging in diameter from 25" to 63" in 3-, 5-, and 7-piece configurations, as well as underground mining wheels from 15" to 24" in 3- and 4-piece configurations. Wheel options and types are referenced below:

Configuration	Type	Rim Size	Page
<b>Surface Mining Applications</b>			
25" 3-PIECE	T, HD	25-10.00/1.5, 25-12/00/1.3, 25-14.00/1.5, 25-17.00/1.7	10
25" 3-PIECE	HD	25-19.50/2.5, 25-22.00/3.0, 25-25.00/3.5	11
25" 5-PIECE	STG, STN	25-11.25/2.0, 25-13.00/2.5, 25-15.00/3.0	12

## Wheel Type Legend

Type	Definition
T	<i>Standard rim assembly with valve hole, general-duty.</i>
TD	<i>Standard demountable rim with valve hole for hub interface.</i>
HD	<i>Heavy-duty design.</i>
STG	<i>Standard rim assembly.</i>
STD	<i>Standard-duty rim assembly.</i>
STN	<i>Standard rim assembly with notch.</i>
HDT	<i>Heavy-duty rim assembly, tapered.</i>
HTG	<i>Heavy-duty rim assembly, no driver pocket.</i>
HTN	<i>Heavy-duty rim assembly, no driver pocket with notch.</i>
HTM	<i>Heavy-duty rim assembly with driver pocket system.</i>
HTHG	<i>Heavy-duty rim assembly, no driver pocket.</i>
HTHM	<i>Heavy-duty rim with driver pocket.</i>
RTEL	<i>Standard "R" style rim with driver pocket.</i>
RHTHM	<i>Heavy-duty "R" style rim with driver pocket.</i>
RW	<i>Standard "RW" style rim with reinforced back, bead seat, and lip for easy demounting.</i>
MRW	<i>Standard "MRW" style rim with machined gutter and "W" style lock ring.</i>
TLS	<i>Tapered locking system for heavy-duty wheels with a double-gutter (DG) design for 7-piece assemblies (for easy demounting and quick changeover), and 6-piece units also featuring an integrated lock ring.</i>

## Tire to Rim Conversion Table

The following table shows common tire and approved rim sizes for each tire according to the "Tire and Rim Association." Due to variances in load, speed, inflation pressure, and type of service, you should always consult with your tire and wheel distributor and/or manufacturer. The use of incorrect flanges can lead to premature tire wear and failures.

Tire Size	Rim Size	Tire Size	Rim Size
14.00-20	20-10.00	33.25-35	35-27.00
14.00-21, 16.00-21	21-10.00	37.25-35	35-31.00

## SAFETY FIRST

## WARNING

*The task of servicing tires and wheels is potentially dangerous and should be performed by trained personnel only, using the correct tools and procedures. Failure to heed this warning could lead to serious injury or death. We urge those involved in the servicing of tires and wheels to read the U.S. Department of Labor and Occupation Safety and Health Administration (OSHA) document 29 CFR part 1910.177 entitled, Servicing of Single Piece and Multi Piece Rim Wheels.*

*NOTE: Single piece rims have the rims made out of a single piece of material and multi-piece rims have a loose flange or flange and lock ring.*

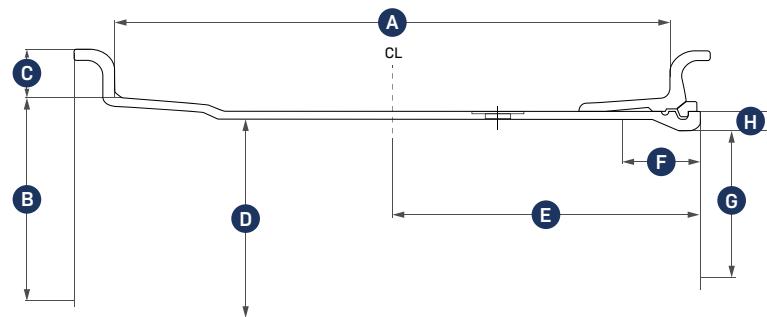

*Wear protective gloves, footwear, safety glasses, and head gear when servicing tire and wheel components.*

*Further references explaining safety procedures can be found in literature published by the Rubber Manufacturer's Association, Washington D.C., the National Tire Dealers and Retreaders Association, Washington D.C., and the National Wheel and Rim Association, Jacksonville, FL.*

## Tapered Lock System

OTR's tapered lock system (TLS) type rim assemblies are available in 5-, 6-, and 7-piece configurations that are compatible with competitors' models, as form-fit-function replacements for stock rims as well. HSLA-grade steel is used for critical components with seamless forged gutters and fully machined sections yielding a best-in-class solution for mining vehicles and earthmoving equipment.

# Mining **Rim Assemblies**

A large, heavy-duty mining truck tire and rim assembly is shown in a quarry setting. The tire has deep, aggressive tread grooves. The rim features a prominent hubcap with a logo. The background shows the rocky terrain of a quarry.

## DOUBLE-GUTTER WHEELS

OTR designs and manufactures 7-piece double-gutter steel mining wheels ranging in size from 57" to 63", enabling easy demounting without having to remove the inside tire in a dual-tire configuration. Wheel sizes and configurations are compatible with industry standards and popular fitments for retrofitting fleets. Wheels include an integrated Sur-Loc system to prevent inflation if using an incorrectly mounted lock ring. As a result, wheel demounting and operation is safe and efficient.

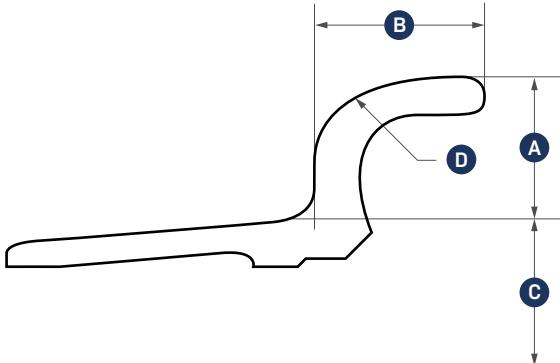

## TIME SAVINGS

Standard mining wheels take, on average, 165 minutes to demount and set up versus OTR's wheel design, which takes less than half that time, saving up to 85 valuable minutes. This ensures more productivity and utilization for vehicles and machines — **the ideal solution for fleets operating 24/7.**

# Underground Mining

## UNDERGROUND MINING WHEELS

OTR's mining wheel lineup for underground haulers and loaders is available in 3- and 4-piece configurations. Manufactured by OTR, these steel wheels feature 100% seamless, hot-forged components with HSLA-grade steel for critical components. A Nut Guard option is available for select units for gutter and driver pocket protection, as well as driver locking systems for high-torque applications. Wheels are supplied to OEMs and the aftermarket with precise fitments for popular vehicles and machines used underground.

20x10 3-piece  
UGM HD wheel assembly  
manufactured in-house;  
100% seamless, hot-forged  
components.

20x15 3-piece UGM  
HD wheel assembly  
manufactured in-house;  
100% seamless, hot-forged  
components.

24x8.5 3-piece UGM HD  
wheel assembly with  
integrated NUT GUARD  
feature for gutter and  
driver pocket protection.

25x14 3-piece UGM  
HD wheel assembly  
manufactured in-house;  
100% seamless, hot-forged  
components.

25x14 3 piece UGM HD  
wheel assembly with  
driver locking system for  
high-torque applications.

OTHER SIZES AVAILABLE.

## WHEEL INSPECTION AND RECERTIFICATION

OTR's after-sale support includes a proven wheel inspection and recertification process for vehicles used at mine sites. This capability is enhanced by OTR's experience in developing and supplying heavy-duty wheels to OEMs, resulting in a core competency that can be leveraged for dealers and end users alike. If wheels are determined to be defective, OTR will work with the OEM, dealer, or end user to specify and supply OEM-approved replacements. The process employed ensures safe demounting with documentation for future reference. Contact your OTR salesperson to discuss how to start this process.

- Verification of wheel condition; isolates defective wheels or wheels nearing end-of-life before there is a potential danger.
- Documentation of wheel duty cycle, application, visible wear, and hidden issues using a proprietary non-destructive testing (NDT) scoping technique to identify potential failures. The main use of the ultrasonic is at ports and some U.S. mines. Mainly Magnetic Particle, but NDT will cover both.
- Full report documenting findings for traceability purposes.
- Training for customer's sales staff and end users, including how to use go/no-go gauges.

OTR can also provide custom-designed go/no-go gauges to verify wheel compliance (pictured left).

## SUPPLY CHAIN PROTECTION ISO-9001

The Customs-Trade Partnership Against Terrorism (C-TPAT) was created by U.S. Customs and Border Protection (CBP) as a voluntary program for companies that are involved in the global supply chain.

**As a C-TPAT partner, we do our part to alleviate supply chain disruption and reduce border delays.**

### FREQUENTLY ASKED QUESTIONS ABOUT C-TPAT CERTIFICATION:

→ **Why does this matter to me?**

Expedited port entry, more accurate delivery schedules, and protecting our borders. Being C-TPAT certified allows our shipping containers to bypass the security-related delays at the ports of entry. Our certification ensures that our supply chain is secure throughout; from the manufacturing facility, through the ports, and on to the final destination.

→ **How much time can be saved by being C-TPAT certified?**

There are many factors involved, but the government estimates that non-certified shipments are 3.5 times more likely to be delayed by security inspection. Also, should a C-TPAT certified shipment be randomly chosen for inspection, it is given priority status and is moved to the front of the existing queue for inspection.

→ **Is C-TPAT certified easy?**

Actually, it is a very comprehensive process that can take years to complete. There are a series of site visits throughout the supply chain, reference checks, paperwork, fees, and even a personal interview. C-TPAT certified companies must permanently adhere to strict policies in order to maintain certification.

## ISO CERTIFICATION

The International Organization for Standardization (ISO) helps to set global standards of excellence for both quality and management systems. Certified companies must undergo rigorous inspections and evaluations to ensure that they adhere to the highest standards.

#### ISO BENEFITS:

- Consistent product quality.
- Product dependability.
- Standardized production and record keeping.
- Enhanced customer satisfaction.

## CONTACT INFORMATION

**OEM Inquiries:** Contact your local OTR salesperson or email [sales@otrwheel.com](mailto:sales@otrwheel.com).

**Aftermarket Inquiries:** Contact your local OTR salesperson or call 800-833-6309 (east of the Mississippi River) or 888-455-4910 (west of the Mississippi).

**Trans American Rubber Tubes, Flaps, or Accessories:** Call 800-922-8823 for additional information.

## WARRANTY INFORMATION

OTR provides limited warranty coverage for tires, wheels, tracks, and other items in the event of defects in workmanship. You may request a copy of our policy by emailing us at [sales@otrwheel.com](mailto:sales@otrwheel.com).

Note that OTR has designated select dealers and distributors to assist with warranty repairs. Contact OTR for more information.

## CATALOG DISCLAIMER

Product specifications and information were correct as of the date of this catalog release, but are subject to change without notice or obligation. Every effort has been made to ensure the accuracy of this catalog. Consult with your salesperson if you wish to verify data is correct.

## ISO 9001: 2015 CERTIFICATION

OTR facilities are ISO 9001: 2015 registered (except for new locations where certifications are in process). ISO ensures consistent product quality, standardization, documentation, and compliance with OEM requirements.

## COMPLIANCE

Assemblies and components manufactured according to Tire & Rim Association (TRA) standards.

**USA-ASTM Standard:** A36/A1011M, A529, A572

**DIN Standards:** ST 37-2, ST42-2, ST52-3

**China Standards:** Q235, Q275, Q345

## REACH COMPLIANCE

OTR's custom tires for OEMs can be designed with REACH compliance. Consult with your salesperson as needed.

## **Disclaimers & Notes**

#### OTR's Commitment:

##### SOLUTIONS

OTR doesn't just sell tires and wheels, we diagnose problems and provide solutions.

##### VALUE

OTR optimizes ROI with high performance & value-added services to deliver results.

##### INNOVATION

OTR has a passion for innovating solutions that exceed customer expectations.

##### PARTNERSHIP

We're not just a vendor, we're a long-term partner who will support your business.
