# TyrLyner®

## Flat Prevention System

TyrLyner® is your insurance policy against flat tires. This solution is a permanent, self-healing urethane rubber liner bonded to the inside of the tire casing which helps keep your equipment moving, prevent flats, seal punctures, and reduce costly downtime.

### How TyrLyner® Works

Forms a uniform layer of self-healing rubber inside the tire

Seals punctures and cuts up to 1/4" in diameter

Works while the equipment is in operation - no special tools required

Heals over nails, screws, and sharp debris

**Making Customers'  
Lives Easier®**

TyrLyner® in action!

## Benefits & Specifications

- Prevents up to 99% of flats
- Lasts the life of the tire
- Reduces downtime, backup equipment needs, and maintenance costs
- Compatible with water, calcium chloride, antifreeze, and other ballast solutions
- Can be applied in more than 200 OTR tires
- No effect on ride quality or wheel performance
- Works in tubeless tires 12"–54" in diameter and up to 15.5" in cross-section
- Adds minimal weight (approx. 10% of tire weight)

## Applications

TyrLyner® is proven reliable for over 30 years across industries and equipment types, including:

- 3-wheel piggyback forklifts and other material handling equipment
- Skid steers
- Construction equipment
- Agricultural machinery and implements
- ATVs and UTVs
- Golf carts
